Spec Projects

Follow up survey of unused safes resulted in turn in of 18 safes, 1 Kardex, 1 map case and cancellation of requisition for 2 new safes. Replacement values of this equipment - \$4,124.

Survey at headquarters for Herring-Hall-Marvin Safes available for exchange located enough safes to permit cancellation of a purchase order for 50 HHM Safes.

Refresher Training Workshops

During 1959 - 3 filing workshops were conducted covering installation and operation of the Agency's Subject Numeric System. 126 employees from 31 offices attended.

During 1960 - 4 workshops were conducted with training in Filing Principles and Procedures. Attended by 185 employees.

Total attendance FY 60 - 311 persons.

Prepared an inventory for more than 5000 cu. ft. of Predecessor Agency Records in RI Archives and evaluated the records in terms of permanent and temporary for Chief, RID.

VITAL MATERIALS REPORT FISCAL YEAR 1960

- /. Participation of the Records Management Staff in Operation Alert 1959 consisted of the following:
 - a. Operation of Vital Materials Repository
 - b. Assisting offices in review of Vital Material Deposits
 - c. Orientation of new emergency personnel in VM Program and repository procedure.
- Met with representatives of G-2 to discuss their Vital Materials Program.
- Accompanied ARO for Office of Training to Isolation to inventory
 Vital Materials Collection and discuss VM Program with

 Executive Officer of the installation This trip paved the way for the development of a very fine VM schedule and program in the Office of Training.

Through the combined efforts of this staff and the DDI VM Committee we were able to provide for the systematic depositing of Finished Intelligence containing Special Intelligence classification. Previous to this effort this type material was not on deposit and constituted a deficiency.

- 5 Conducted a study of EAM needs at Relocation. It is anticipated that this study will permit the reduction of required EAM equipment resulting in monetary savings.
- Completed microfilming of the OCR/Graphics Register/Ground and Personality still photo file. This action corrected a deficiency that existed for several years, since 1952.

dure for DDP. This assistance was very significat, resulting in the establishment of seventeen (17) Vital Materials Deposit Schedules, and the review of all Vital Materials in the repository. Of equal importance is the fact that we were successful in bringing together responsible VM officials in DDP and DDI.

The VM Program has prospered through this association in the fact that DDP and DDI have exchanged ideas and lists of Vital Materials each is responsible for depositing, thus eliminating the possibility of duplication.

2. Reviewed and commented on paper prepared by the DDP/RMO regarding relocating of the present agency repository.
